Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 6-7, 11-12, are rejected under 35 U.S.C. 102(e) as being anticipated by US 6925361 (Sinnock).

Sinnock discloses a system comprising a storage device 22A, a control system for buying/selling energy from energy users 24A, a controller 20 enables electricity transaction on wholesale market (column 8, lines 10-40), energy users can buy/sell from the energy storage device 22 (column 7).

Claims 1-2, 6-7, 11-12, are rejected under 35 U.S.C. 102(e) as being anticipated by US 2004/0220869 (Perera).

Perera discloses a system comprising a storage device, a control system for buying/selling energy from energy users, a controller 103, 105 enables electricity transaction on wholesale market (abstract), energy users can buy/sell from the energy storage device.

Art Unit: 3748

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5, 8-10, 13-15, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 6925361 (Sinnock) in view of U.S. 6860068 (Halloran). Sinnock discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose a potential energy system. Halloran is relied upon to disclose a potential energy storage system comprising a hydraulic reservoir 18, pipes and hydraulic chambers 2 for supplying fluid to the reservoir, said fluid can be used to generate energy if needed through turbine 14. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide a potential energy storage in Sinnock as taught by Halloran for the purpose of storing energy.

Art Unit: 3748

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brassard, and Rastegar et al disclose potential storage systems.
